**Subject :- Loan 2366 and Loan 2506-IND RUSDIP : Submission of Revised Biannually
Social Monitoring Report ending December 2010**

Reference :- e-mail dated 17.05.2011

Sir,

In compliances to ADB's Social safeguard policy kindly find enclosed herewith the revised Biannually Social Monitoring Report ending December 2010 for further necessary action please. The report covers 35 Nos. of sector's which SRPs are under implementation stage and covered in the monitoring period June 2010 to December 2010. All suggestion as conveyed through referred e-mail incorporated in the report and point wise reply of comments also prepare and enclosed with this letter. Status of disbursement claim up to Dec. 2010 appended on Appendix-7, Status of consultation with APs up to Dec. 2010 is appended on Appendix-8 and Status of other activities conducted by ACO up to Dec. 2010 is appended on Appendix-9.

Attachments: As above

With Regards,

Yours sincerely,

Additional Project Director

No. F3 (106)(53)/ RUSDIP/IPMU/Social & RP/2011-12/

RAJASTHAN URBAN SECTOR DEVELOPMENT INVESTMENT PROGRAM

BIANNUAL SOCIAL MONITORING REPORT IMPLEMENTATION OF SHORT RESETTLEMENT PLANS

Duration July - December 2010

Executive Summary

1. The Government of Rajasthan (GoR), with the financial assistance from Asian Development Bank (ADB) in form of a multi-Tranche financing facility (MFF), decided to strengthen urban management and support for priority investments in urban infrastructure in towns namely Alwar, Baran, Barmer, Bharatpur, Bundi, Chittorgarh, Churu, Dhaulpur, Jaisalmer, Jhalawar-Jhalarapatan, Karauli, Nagaur, Rajsamand, Sawai Madhopur and Sikar under the Rajasthan Urban Sector Development Investment Program (RUSDIP). The total population of these towns was about 1.6 million as per the Census 2001. The Investment Program is designed to cover major urban infrastructure works under water supply, waste water management, solid waste management, urban transport and roads, social infrastructure, support infrastructure for cultural heritage and urban drainage sectors.

2. The Executing Agency (EA) for the Investment Program is Local Self Government Department (LSGD) under the Urban Governance Department of GoR. The program will support overall improvement of urban environment cum living conditions as well as increase in tourism activities. State Cabinet on 5 March 2008 approved RUSDIP, in three Tranches, with loan financing from ADB and corresponding shares of state and ULB. Responsibility for repayment of loan and payment of own contribution is determined with respect to ownership.

3. The Loan Agreement and Project Agreement of Loan 2366-IND Tranche 1 of \$75 million, with a loan component of \$60 million, were signed on 17 January 2008 and made effective from 28 February 2008. Tranche 1 consisted of 20 packages of civil works. Under Tranche 2, 25 packages were finalized by GoR costing \$219 million. The periodic financing request (PFR) for Tranche 2 was submitted by GOR for \$150 million loan component, and was approved by ADB as Loan 2506-IND. The Loan Agreement and Project Agreement for Tranche 2 were signed on 18 February 2009 and made effective from 28 February 2009. The loan processing for Tranche 3 is over and all official formalities are likely to be completed by March 2011.

4. The Investment Program envisaged to strengthen urban management and support for priority investments in urban infrastructure in 3 towns of Alwar, Jaisalmer and Jhalawar-Jhalarapatan under Tranche 1 and 12 towns namely Baran, Barmer, Bharatpur, Bundi, Chittorgarh, Churu, Dhaulpur, Karauli, Nagaur, Rajsamand, Sawai Madhopur and Sikar, under Tranche 2. The short resettlement plans (SRPs) were prepared for 10 subprojects under Tranche 1 and 25 subprojects under Tranche 2 (a total of 35 SRPs) following ADB's Involuntary Resettlement Policy, 1995. (see **Appendix 2**). List of approved SRPs and Categorization Check Lists (CCLs) have been appended as Appendix 4. All these SRPs have been approved by ADB and are under various stages of Implementation. It may be noted however, that in some cases, additional or change in scope of work has made revision of SRP mandatory and this process is on going. The table in **Appendix 4A** is a reflection of the status of approved SRP and CCL till December 2010. *The Appendix 4B is a reflection of status of approved SRP and CCL till April 2011. The Appendix 4C is a reflection of current status of SRP and CCL pending for approval/submission till April 2011.*

5. However, 11 (eleven) subprojects are proposed to be included under Tranche 1 and Tranche 2 as additional packages, while three subprojects have changed in alignment or scope of work. Thus, a total of 14 SRPs are in various stages of preparation. See **Appendix 3**.

6. In Tranche 1, there are 68 affected persons (APs) while in Tranche 2 there are 516 APs. Of the total 584 APs, 78 belong to the vulnerable groups¹. The implementation of SRPs started in June 2008. The Investment Program Implementation Units (IPIUs) of the RUSDIP under Investment Program Management Unit (IPMU), headed by a Project Director, are implementing the SRPs.

7. Community Action and Participation Program (CAPP) has been undertaken in RUSDIP for mobilization, motivation, participation and community awareness. M/s Indian Institute of Rural Management (IIRM), Jaipur has been engaged as CAPP consultant from August 2008. Community mobilization has been activated through various public meetings, campaign and media means. CAPP has been organizing the public awareness campaigns for appraising the short-term inconveniences and long-term benefits of the project in order to gain full support of the beneficiaries. CAPP has also been helpful to make beneficiaries aware of preventive care to avoid environmental health-related hazards during construction and of their responsibilities to avoid the wastage of water, including issues such as water rates, metering, user charges and property tax reform, etc. for achieving the goals of the Investment Program in totality. In addition, it provides feedback to the IPMU with a view to adjusting the work program based on the impact of the campaign and concerns raised by the beneficiaries/stakeholders.

8. Indian Institute of Rural Management (IIRM), Jaipur was also assigned the responsibility of implementing the social safeguard requirements and to assist the IPIUs in implementing SRPs. The social expert of the Investment Program Management Consultancy (IPMC) was entrusted with the responsibility of monitoring the implementation of these SRPs, and assess its performance and effectiveness, on the basis of review of reports, field observations, consultations with APs, other stakeholders, IPIUs and IPMU.

9. This report covers the 10th and 11th quarter of the implementation programme till December 2010. According to RF, after initial two years of project implementation, the monitoring reporting schedule changes from quarterly to bi-annually. Accordingly, this report covers second half of 2010 (July – December 2010). During this time, in addition to the identification and verification process of APs, distribution of identity cards and disbursement of compensation were undertaken. It is confirmed that in all the subprojects which are covered in this report, there is no indigenous people (IP), no land acquisition issue and all impacts are temporary in nature², where the livelihood of the people would get impacted only during the construction activity, for which they would be compensated as per the ADB guidelines.

10. During the first quarter, the City Level Committee (CLC), also acting as Grievance Redress Committee (GRC), became functional at the district level. Identity cards for APs have been prepared after verification and validation by the NGO. However, in most cases, assistance money has not been disbursed because civil works are yet to commence in that section. The remaining tasks of the NGO include finalization of micro plans, distribution of identity cards to all APs, opening of bank/ post office account for the APs, distribution of resettlement assistance and organizing HIV awareness campaign, which are ongoing. The details of NGO Activities are provided at Appendix 9.

¹ Vulnerable groups include BPL, SC, ST, WHH, disabled persons, etc

² Barring Sikar solid waste management project, wherein two small community property resources (CPRs) and one shrine may have to be relocated from the site of the landfill after mutual agreement and consultation with the villagers of the Nani.

RAJASTHAN URBAN SECTOR DEVELOPMENT INVESTMENT PROGRAM

BIANNUAL SOCIAL MONITORING REPORT IMPLEMENTATION OF SHORT RESETTLEMENT PLANS

Duration July - December 2010

A. Description of the Project

1. **Background:** The Local Self Government Department (LSGD) under the Urban Governance Department of Government of Rajasthan (GoR) is executing the Rajasthan Urban Sector Development Investment Program (RUSDIP) in 15 towns namely, Alwar, Baran, Barmer, Bharatpur, Bundi, Chittorgarh, Churu, Dhaulpur, Jaisalmer, Jhalawar-Jhalarapatan, Karauli, Nagaur, Rajsamand, Sawai Madhopur and Sikar with financial assistance from Asian Development Bank (ADB) under Multi-tranche Financing Facility (MFF). The investment program covers major urban infrastructure works viz., water supply, waste water management, solid waste management, urban transport and roads, social infrastructure, support infrastructure for cultural heritage and urban drainage. The Investment Program period is for 7 years i.e. up to 2014 starting in 2008. It is expected that the Investment Program would improve infrastructure through the development, design and implementation of a series of subprojects, each providing improvements in a particular sector (water supply, sewerage, solid waste, etc.) in each town.

2. Tranche 1 of Investment Program covers Alwar, Jaisalmer and Jhalawar-Jhalarapatan towns and is currently under construction stage. Tranche 2 covers the remaining 12 towns namely, Bharatpur, Karauli, Dholpur, Sawai Madhopur, Churu, Sikar, Barmer, Nagaur, Chittorgarh, Rajsamand, Bundi and Baran. Tranche 1 and Tranche 2 are under different stages of implementation while loan for Tranche 3 sub projects is under processing. However, there are 11 subprojects which have been added to Tranche 1 and Tranche 2 and for 3 subprojects there have been some change in alignment and scope. In total 14 SRPs are in various stages of preparation. The Investment Program is intended to optimize the socio economic development in district headquarters and towns, improve the urban environment cum living conditions as well as boost tourism activities.

3. The Investment Program Management Unit (IPMU), headed by Project Director with assistance by experienced engineering and finance officers, is responsible for project execution, implementation and management cum supervision of subprojects. The NGO (IIRM under CAPP) is assisting the Investment Program Implementation Unit (IPIUs) in implementation of the R&R activities successfully. The short resettlement plans (SRPs) have been prepared according to the Involuntary Resettlement Policy, 1995 of the ADB. This report deals with the implementation progress of these plans under Tranche 1 and Tranche 2 subprojects for the period July- December 2010.

B. Institutional Arrangements

4. The Executing Agency (EA) for the Investment Program is LSGD under the Urban Governance Department of GoR. The program will support overall improvement of urban environment cum living conditions as well as increase in tourism activities. The IPIU internally monitors the implementation of SRPs and looks after other safeguard issues. IPIU field offices have been established for different packages to assist in the coordination and day-to-day implementation and management of the Investment Program. The Executive Engineers were deployed as Resettlement Officers (ROs) at the field office level and are working closely with the District Collector, Panchayat Level Committees and NGO, to expedite the payments of assistance to affected persons (APs).

5. To implement social safeguard documents, the EA engaged IIRM, Jaipur based NGO, who was mobilized on 2 August 2008 for implementation of SRPs and to assist IPIUs in the implementation of SRPs with a specific program called Community Action and Participation Program (CAPP). The social expert of the Investment Program Management Consultancy (IPMC) was entrusted with the responsibility of monitoring the implementation of these SRPs, and assess its performance and effectiveness, on the basis of review of reports, field observations, consultations with APs, other stakeholders, IPIUs and IPMU. Internal monitoring is done on monthly basis while external monitoring has been on quarterly basis for the first two years and subsequently would be conducted bi-annually.

6. IIRM is assisting the IPIUs in implementation of SRPs through their Assistant Community Officers (ACOs) engaged for different towns. Each ACO is in charge of all subprojects that fall in that particular town. A total of 15 ACOs, having experience between 3 to 12 years, have been mobilized at all 15 project towns' upto December 2010. Their knowledge about the local area and familiarity with local dialects is expected to facilitate the implementation process. The core unit of CAPP imparted training to ACOs on resettlement and rehabilitation (R&R) before mobilizing them at the respective project town. The ACOs and the social expert in charge of the overall CAPP activities are trained on R&R activities and have attended several workshops to enhance their skills in SRP implementation. Details about the mobilization schedule of ACO are provided at **Appendix 1**.

C. Implementation of Resettlement Activities

7. This subsection deals with the implementation of resettlement activities under various subprojects in 3 towns under Tranche 1 and 12 towns under Tranche 2, which are under construction, during the monitoring period. Details are provided at **Appendix 2**. Please note that 35 SRPs are prepared sector wise (excluding ROB's) which includes one or several packages under one sector. For example in Alwar Waste Water there are 4 packages i.e. RUSDIP/TR-1/ALW WW/02 (Lot-1), RUSDIP/TR-1/ALW/WW/02 Lot-2, RUSDIP/TR-1/ALW/WW/01 Lot-2, and Additional Package RUSDIP/TR-01/ALW/WW/03 but one single SRP (Alwar Waste Water) including the Additional package was revised and submitted to ADB for Approval.

8. The list of additional subprojects being considered for the coverage under Tranche 1 and Tranche 2 is provided at Appendix 3.

D. Overview of IIRM under CAPP Activities

9. The field officials of IIRM under CAPP are engaged and assisting IPIUs in SRPs implementation in the Project area. The resettlement activities are as under:

- To identify affected persons (APs), key stakeholders and consult closely with them on their views about the project and resettlement impacts, To identify vulnerable groups (for example the very poor- BPL, households headed by women, SC, ST, the disabled) who require special assistance and consult with them.
- To provide assistance to APs for opening bank account if required
- To disburse the assistance money (in cheques) to APs.
- Public Information and Disclosures of SRP in local vernacular language
- Distribution of AP's Identity Cards
- Employment of APs in Project Civil Works

- Coordinate with Grievance Redressal Committee (GRC) - City Level Committee to function as GRC.
- Collection of data on the progress of implementation and internal monitoring.
- In addition, several awareness campaigns, seminars, orientations, trainings, sewer and water connectivity camps have been organized at different levels on various aspects like health, hygiene, water and sanitation, solid waste management, sewerage, property connection, road safety and other program related activities. IEC material is circulated to APs and other stakeholders on the above issues. The programs are designed to help enhance the understanding of the program and through people's participation ensure sustainability of the assets/services provided.

10. Data is being collected on the prescribed format by all Assistant Community Officers (ACOs) stationed at different subproject towns to monitor the progress of RP implementation.

E. Project Impact

11. Under the 6 subprojects in Tranche 1 and 18 subprojects in Tranche 2 mentioned below, no land acquisition and no permanent impact including any impact on the IPs were entailed. All other impacts are temporary in nature barring the Sikar solid waste management subproject involving relocation of two small CPRs and one shrine.

12. List of the various sub projects with their Impact and corresponding AP's have been included in the Tables 1 & 2 below. For further details of AP's, assistance disbursement date and status refer **Appendix 5**.

Table 1: Summary Status of AP's under Tranche 1

(Amount in INR)

Subproject Name	Type of Impact	No. of APs	Vulnerability Status	Time Period	Entitled Amount
Alwar Bridge	Temporary*	03	0	90	38,940
Alwar Waste Water	Temporary*	15	0	14	25,260
Alwar Water Supply	Temporary*	02	0	14	3,200
Jaisalmer Waste Water	Temporary*	23	13	14	92,450
Jaisalmer Water Supply	Temporary*	23	13	14	92,450
Jhalawar Water Supply	Temporary*	2	0	14	3,864
Total		68	26		256,164

* Temporary loss of livelihood for a period of minimum of 14 days to a maximum of 90days

Table 2: Summary Status of APs under Tranche 2

(Amount in INR)

Subproject Name	Type of Impact	No. of APs	Vulnerability Status	Time Period	Entitled Amount
Baran Bridge	Temporary*	24	2	90	463,280
Barmer Waste Water	Temporary*	35	1	14	49,000
Barmer Water Supply	Temporary*	35	1	14	49,000
Bharatpur Drainage	Temporary*	03	0	20	10,800
Bharatpur Water Supply	Temporary*	05	0	14	16,430
Bundi Waste Water	Temporary*	50	0	14	387,100
Bundi Water Supply	Temporary*	24	15	14	101,028
Chittorgarh Bridge	Temporary*	3	0	90	50,080
Churu Bridge	Temporary*	1	0	90	7,400
Churu Water Supply	Temporary*	2	0	14	3,200
Dholpur Waste Water	Temporary*	01	0	14	1,600
Nagaur Waste Water	Temporary*	98	15	14	203,840
Nagaur Water Supply	Temporary*	98	15	14	203,840
Rajsamand Waste Water	Temporary*	27	1	14	110,740
Rajsamand Water Supply	Temporary*	13	0	14	43,498
Sawai Madhopur Bridge	Temporary*	06	0	90	67,700
Sawai Madhopur Waste Water	Temporary*	01	0	14	3,500
Sikar Waste Water	Temporary*	90	2	14	160,100
Total		516	52		1,932,136

* Temporary loss of livelihood for a period of minimum of 14 days to a maximum of 90 days

NB: This list excludes the subprojects with no Impacts/APs

F. Policy and Legal Framework

13. The policy framework and entitlements for the Program are based on national laws: The Land Acquisition Act, 1894, (amended in 1984) the National Resettlement and

Rehabilitation Policy, 2007 (NRRP); and ADB's Policy on Involuntary Resettlement, 1995 and the agreed Resettlement Framework (RF). Subsequently, SRP was prepared for each sub-project. The main objective of the Investment Program is to reduce poverty levels in the State. Project and project components (subprojects) assisted by ADB warrants safeguards in the form of resettlement plan in order to address adverse social impacts such as losses of land, resources, and means of livelihood or social support systems.

G. Validation and Verifications of AP's

14. All the APs have been validated and verified by the implementing NGO at their respective towns this was done with field verification (both signature, photos & proof of identification like voter ID etc were taken) were made before Subproject ID Cards disbursement. Thereafter during lively hood assistance disbursement some APs could not be located or traced. Efforts are still being made by the NGO to trace them. Further details are appended in **Appendix 5 - R & R Assistance Distributed/Disbursed Details**.

H. Distribution of Identity Cards

15. Out of total 68 APs under Tranche 1 and 516 APs under Tranche 2, identity cards have been distributed to 47 APs and 365 APs, respectively. The distribution of identity cards to remaining APs is under process.

I. Compensation and Assistance

16. APs will be provided 30 days advance notice to ensure no or minimal disruption in livelihood. If required, they will also be assisted temporarily to shift for continued economic activity. For example, they will be assisted to shift to the other side of the road where there is no construction. Ensuring there is no income or access loss during sub-project construction is the responsibility of contractors. Consistent with the initial environmental examination, contractors will ensure: leaving spaces for access between mounds of soil, providing walkways and metal sheets to maintain access across trenches for people and vehicles where required, increased workforces to finish work in areas with impacts on access, timing of works to reduce disruption during business hours, phased construction schedule and working one segment at a time and one side of the road at a time.

17. Should construction activities result in unavoidable livelihood disruption, compensation for lost income or a transitional allowance for the period of disruption whichever is greater will be provided. Vulnerable APs will be given priority in project construction employment.

18. Of the total 584 APs, 78 APs belong to the vulnerable groups (BPL, SC, ST, WHH, disabled persons etc)³. All the APs will be compensated and/or are being compensated in accordance with the agreed entitlement matrix of SRPs. APs would be compensated for varied number of days based on the type of subprojects. Due to the impacts of subprojects for water supply and waste water; drainage and bridge; and ROB projects, 14 days, 20 days, and 3 months compensation amount would be paid to the APs respectively. The shifting assistance would also be provided to kiosks and those APs who are vulnerable and are entitled for additional assistance. If any structure gets temporarily affected, then also the contractor would re-establish that particular structure after the project is over. Besides these assistance, ramps would be provided in front of residences and shops to provide access to people and also the mobile vendors would be assisted in shifting to nearby area or opposite

³ The list of APs will be provided in the subsequent external monitoring reports.

side of the road when construction in that particular stretch would take place. The loss of frontage/ structures if any would be borne by the contractor and this has been included in the contractor's TOR. The PIU is advised to review the assistance disbursement process carried out by the NGOs and finalize it, so as to facilitate assistance to the APs.

19. Total INR 510568/- is disbursed to APs under Tranche 2 and Tranche 1.

20. Approval of the SRP is required prior to award of civil works; and disbursement of compensation/ assistance of APs is required prior to commencement of civil works.

J. Public Consultations and Disclosure of SRPs

21. A series of meetings and consultations were held with the APs and other stakeholders on the project, entitlement options, impacts etc. were held on different stretches since the inception of the RP implementation. These are mainly organized by the CAPP. The details of Public Consultation meetings are provided at Appendix 7. A town-wide stakeholder consultation workshop was conducted which provided an overview of the Investment Program. During the workshop, Hindi versions of the RF was provided to ensure stakeholders understood the objectives, policy principles and procedures for any land acquisition, compensation and other assistance measures for any AP. During consultations, key issues raised were: (i) participants expressed satisfaction that there was a subproject taking care of their needs which they have waited for 25-30 years; (ii) they are not hesitant to move or shift if necessary to accommodate the work; (iii) they are willing to provide labor for the subproject; and (iv) they raised that it is important to cover up the dug holes properly and restore the roads after sub-project construction. Information continues to be disseminated to APs and beneficiaries through various media. English and Hindi versions of the RF and SRP are placed in the Urban Local Body (ULB) office and APs have access to the SRPs. The NGO engaged to implement the SRP will continue consultations, information dissemination, and disclosure. The SRPs are available in the ULB office, IPMU's and IPIU's offices, and the town library, wherever present. The finalized SRPs will also be disclosed in ADB's website, and the RUIDP website. The information will also be made available at a convenient place, especially in all the relevant offices, which will be accessible to the APs.

K. Grievance Redressal

22. The City Level Committee (CLC), acting as a grievance redress committee (GRC) is chaired by the District Collector with representatives from the ULB, state government agencies, IPIU, community-based organizations (CBOs) and NGOs. As GRC, the CLC meets every month. Till now, no case has come to GRC in any of the 15 towns where the implementation of the subprojects is under progress. The grievance redress mechanism is provided at Appendix 6. So far in none of the City Level Committee (CLC) meetings, grievances have been recorded. The details of City Level Committee (CLC) meetings are provided at Appendix 8.

L. Issues and Action Plan

23 Urbanisation has increased at a rapid pace in India over the recent years, much faster than the increase in urban infrastructure facilities to support them. Also, pressure of population has been more on larger towns/cities putting enormous pressure on the resources of municipalities so much so that most are unable to keep up with the provision of even basic services and infrastructure resulting in irregular availability of water, sanitation and public amenities. In extreme cases, this has aggravated risks to public health and safety. Rajasthan is no exception and all the 15 towns selected under this programme is in dire need of up gradation of such urban infrastructure facilities which includes, augmentation

of water supply, sewerage network, drainage facilities, road improvement, ROB construction and of course solid waste management.

24 Experience from ADB-funded urban projects show complex social, economic, legal, institutional, and management issues in urban development – largely derived from realities of urban life in developing countries like India. Urban projects typically consist of a variety of infrastructure such as roads, power, water, sewerage, gas pipelines, and slum improvement/upgrading activities. It is important to mention in this context that the final detailed engineering design in each sub project of RUIDP was prepared keeping in mind to avoid or minimize social impact as far as possible. However, since all the developments foreseen are town centric, it is difficult to avoid any impact whatsoever in densely populated towns.

25 The social impact in all 15 towns is primarily temporary in nature affecting mobile/ambulatory vendors who are earning their livelihood by using public land and therefore non-title holders. But according to ADB guidelines, their legal status is not a determining factor for livelihood entitlement. Recognising the adverse impacts of the project and the need to address the involuntary resettlement and other related adverse social impacts, Govt. of Rajasthan formulated the resettlement and rehabilitation framework consistent with applicable laws, notifications and policies that are relevant in the context of the implementation of the project activities. Thus provision of livelihood assistance for mobile/ambulatory vendors was made in the R&R Framework in view of disruption likely to be caused due to implementation of project activities. It was agreed that for implementation of different infrastructure works the livelihood disruption would vary between 14 days to 3 months and assistance would be accordingly paid/given APs. Therefore 14 days for water supply, waste water& road improvement, 20 days for drainage and 90 days for ROBbridge were considered/ as the disruption period for which compensation/livelihood assistance would be provided to the APs. Additional assistance for vulnerable APs and shifting assistance where ever applicable is being provided to the APs as per the Resettlement Framework , refer Appendix 5. It is important to mention here that in many of the Banks (WB & ADB) assisted projects provision for livelihood assistance to mobile/ambulatory vendors is not available. Therefore it may be considered as one of best practices of resettlement plan implementation.

26 It was further agreed that that resettlement assistance would be disbursed just before civil works initiate in a particular section or stretch just before the contractor moves in. This is being done on purpose so as to avoid unnecessary interference in the construction job leading to delay in implementation work.

27 There are no indigenous peoples (IPs) in any of the subprojects and also there is no land acquisition involved in Tranche-1 and Tranche-2 sub-projects. Further there is no permanent impact except in Sikar SWM (proposed under Additional Package of Tr-2) where a few structures are likely to get impacted. (refer to SRP for further details).

28 After transect walk and census and socio-economic survey of affected persons present at site were conducted. SRPs were prepared providing details of APs (name, location, socio-economic status and entitlement).But after approval of SRP when ACOs (Assistant Community officer) went to site for verification of identified APs for distribution of I-D cards and to further help APs in opening of bank accounts for disbursement claims, most of AP's (in many cases about 40%) could not be traced/located as they had/have migrated from the town and or shifted to some other places in demand for job/occupation.

29 After identification of APs ID Cards were distributed but some were found missing; efforts are being taken by NGO to trace them. It has been very difficult to locate these APs in Tranche 1 and 2. The ACOs however tried their best but were unable to trace even after repeated attempts. After all attempts failed, ACOs have collected records of written information from surrounding vendors or shopkeepers that the APs who are missing or cannot be located have migrated or shifted to some other town.

List of SRPs where AP's migrated or non-traceable

S. No.	Town	Sub project	Total APs	I-Card Distributed
Tranche -1				
1	Jaisalmer	Water supply	23	15
2	Jaisalmer	Waste water	23	15
Tranche -2				
12	Barmer	Water Supply	35	22
13	Barmer	Waste Water	35	15
26	Nagaur	Water Supply	98	64
27	Nagaur	Waste Water	98	64
29	Rajsamand	Waste Water	27	16
33	Sikar	Waste Water	90	65

30 Additionally, it must be noted that since the total figures of APs remain the same, and due to no change in status of migrant APs, the resettlement activities can never get updated on those missing APs and in all monitoring reports this gap exists.

31 So the policy should be accordingly revised to address this issue. It clearly should define that APs who are not available after a certain time period (may be one year) of SRP approval should be deleted from the list of APs and SRP revised accordingly.

32 In some towns differences arose due to pronunciation problem during noting down the actual name of APs during census survey. After SRPs were prepared and approved, when ACOs visited site for verification exercise, they noted the difference in actual spelling in the name of APs in comparison to names written in SRPs due to pronunciation of name in Rajasthani language (local dialect). There should be provision in the RF or policy to allow correcting the name and accordingly proceeding with disbursement. Rectification of name or spelling should not call for a revision in SRP.

M. Lessons Learnt and Good Practices

33 Good practices in RP implementation vis-a-vis RUIDP is presented below:

SI No	Good Practices in RP implementation	
	Good Practices	Incorporated in RUIDP
1	All affected persons – titled and non-titled – were covered by the project	The resettlement policy covered all affected persons, titled and non-titled , affected persons
2	All types of losses were identified through census and socio-economic surveys	All data were collected through fresh census/surveys so that everyone affected is covered

SI No	Good Practices in RP implementation	
	Good Practices	Incorporated in RUIDP
3	Detailed entitlement matrix established to compensate for all kinds of losses, dislocation and resettlement	The entitlement matrix has covered all types of probable impacts with scope for even any non conceivable impact with particular emphasis on additional assistance
4	Photo ID Card with description of losses and entitlements	ID Card for all affected persons prepared
5	Special assistance to vulnerable groups	Special attention to and assistance for vulnerable groups, including female-headed poor households, disabled family members etc.
6	Livelihood assistance	Livelihood assistance to all those temporarily affected (mobile/ambulatory vendors) in accordance to days of impact
7	GRC for disputes	GRCs have been established at all 15 towns. In fact it was decided that the CLC would doubly function as GRC.
8	Public participation in resettlement management	Major initiative undertaken for public consultation, disclosure and participation of the affected persons
9	Regional /local project monitoring	PIUs in each town to monitor implementation
10	NGO involved in resettlement operations	IIRM under CAPP program has been engaged for RP implementation, income restoration, skill training, gender plans, public health, AIDS/HIV awareness and prevention activities

Lessons Learnt

- People in general cooperate as they understand it is for their benefit and they are the ultimate beneficiaries.
- Dissemination of information about the sub-project from initial stage and transparency in monetary disbursement is essential to gain confidence among stakeholders.
- Employment generation by making mandatory for contractors to employ local labour for construction works (unskilled works) wherever applicable.
- Vendors mostly offer to shift voluntarily during implementation as mostly they are non title holders and also the disruption is only for 2 weeks in most cases.
- Frequency of CLC meetings should be more to solve any issue quickly and meetings should be more participatory in approach by involving all stake holders.
- Implementation could have been smoother and faster with appointment of more ACOs from the NGO side. At present only one (1) ACO in each town to manage all subprojects that come under its jurisdiction.
- Consultation and informal discussion with stakeholders on resolving critical issues amicably like in Baran water supply where pipelines are passing through private land and in Sikar solid waste management where locals have given their consent to the construction of landfill.

- In some sub projects people have come forward to help executing agency in implementation of the project. Best example in Jaisalmer water supply and waste water projects where APs have refused to take assistance money but promised to cooperate in the project as and when required.

Developing Learning Mechanism in the Project

34 The project is doing the following to promote learning:

- Promoting cross learning within organization through scheduled staff meeting at all level, encouraging informal project related discussions among staff, writing case studies of best practices in project and sharing of the same, documenting learning and disseminating them on different project forum and establishing system for information flow among staff.
- Organizing exposure visit of staff and community from one project district to another district for sharing of knowledge and learning from each other.
- Promoting cross learning with other program/project – This would be encouraged among staff to allow them attending relevant workshops, seminars and other events, sharing reports of attended events with other project staff and organizing exposure program for staff.
- Systematizing review process at all levels of project. This would focus on input and output review, process review with special reference to draw learning in project implementation. The monitoring unit would work closely for this.
- Counselling for staff would be very important in effective functioning of learning system as and when required. The functional head at PMU will also be delegated authority of counselling their respective staff.
- Organizing Annual Colloquium on RUIDP achievement – An annual event for dissemination of learning of RUIDP and also for knowing best work by other similar agencies would be planned. Such event would help in improving staff learning through exposure of great work on a single forum.
- Inviting trainees (from both national and international institutions, colleges and universities) would help project to have external academic perspective of its work. Many fresh entrants from colleges and universities have been inducted in DSCs keeping this perspective in mind.
- The project staffs would participate in the knowledge sharing platforms in workshops organized at PMU level.

Good Practices

35 Two main exogenous factors that influence any infrastructure project are:

- Urbanization, which has proceeded rapidly in India including Rajasthan. In line with this increased urbanization, the demand for services like drinking water and sanitation facilities with roads and river bridges have grown rapidly in the growing towns. This growth in demand has created a need for investment for the sustainable delivery of such services.
- Decentralization is the second factor that influenced projects in Rajasthan too. This led to devolution of responsibility for policy, planning, financing, and decision making for development to the local government level. Local governments in these countries are now increasingly undertaking cost-recovery measures, tariff reviews, and tariff increases, sometimes in consultation with local residents.

These reforms and other measures allow a greater role for local planners if local institutional capacity is developed; this has the potential to have a positive effect on project implementation.

36 Successful infrastructure projects which RUSDIP has taken up under three tranches like water supply, waste water, drainage, ROBs , fire fighting, heritage restoration works etc. all positively affect their intended beneficiaries by providing them with a better quality of life. Benefits are generally long-term and pro-poor, and tended to impact women, children, and other disadvantaged groups proportionately more than men and other socially empowered groups. This is particularly true in case of water supply and waste water subprojects. However, during project implementation, some minor negative impacts in the form of disruption of livelihood to some may occur. ADB guidelines address these issues adequately. However, in the context of larger interest of the town, these temporary inconveniences may have to be borne keeping in mind to reduce impact as far as possible to public in general.

37 Some of the good practices that have been adopted in these subprojects have been listed below.

- Ongoing and efficient operation and maintenance (O&M) is an important issue in ensuring the long-run sustainability of the benefits of infrastructural facilities especially in case of water supply and waste water. Successful projects typically are those that (i) are run by financially self-sustaining water supply/waste water institutions, (ii) put in place user committees (UCs), and (iii) adopted the “user pays” principle. A lesson learned was that the early establishment of UCs fostered greater beneficiary participation, resulting in a stronger sense of ownership and willingness to accept O&M responsibility among project beneficiaries.
- Another striking feature of successful projects was their ability to learn from past lessons and incorporate these lessons in future project design. For example, a key lesson learned from early infrastructure projects was the effectiveness of the community-based approach to water supply or waste water projects in particular. Under such an approach, projects are designed incorporating the learned experience from the community, and communities directly participate in rendering the systems sustainable. Other past lessons successfully adopted in later projects involved designing projects in a cost-effective manner, and strengthening institutional capacities. Mistakes of Tranche 1 were not repeated in Tranche 2 and 3 and lessons learnt from earlier tranches were successfully used later as when needed.
- Technical innovation characterized many of the successful projects. For example, in Bharatpur Waste water project (under RUSDIP Tranche 3), a new technology called **Sequential Batch Reactor (SBR) technology** has been adopted in Municipal Sewage Treatment. SBR reactors are utilized to treat waste water such as sewage or output from anaerobic digesters or mechanical biological treatment facilities in batches. The SBR technology (Somewhat Similar and comparable to ASP) is being introduced by RUSDIP for the first time in Bharatpur. Where the land prices are more and capacity of Plant up to 25 MLD which need not contemplate Gas Recovery and effluent quality requirement is more (which is to cater to any subsequent reuse/or effluent discharged to a water body), SBR is preferable.
- A participatory approach was adopted in many of the successful projects and appears to have contributed to their success. Successful projects were typically formulated through extensive consultations with local government staff, local nongovernment organizations (NGOs), representatives of people, and other

beneficiaries to discuss concerns about the impacts of such infrastructure projects. This approach helped to foster a sense of ownership and ultimately contributed to improving the sustainability of the projects. As an example, in all sectors and in all the towns under RUSDIP programme, continuous consultations are being held with the community at different levels, both in the form of formal and informal consultations. In several RUSDIP projects, community has actively participated and suggested alternative solutions to problems encountered while implementation.

- Further, the review of successful projects indicates that strong commitment by governments, both national and local, is one of the key determinants of project success. A high level of commitment by municipal/provincial governments in making the project facilities operational as quickly as possible, together with sound management support in the agencies concerned, was a notable feature in the implementation of several of the infrastructure projects. In RUSDIP, the coordination among the different PIUs and PMU at the centre is very active and smooth. Regular workshops are organized at the nodal headquarters at Jaipur to discuss all cross cutting issues like standardization, tendering, social and environmental safeguards etc.
- Generally, the original objectives and overall design of successful projects remained unchanged during implementation. Where there were changes in design details,(in DPR stage), the modifications in general did not result in increased impact or project costs. Though SRPs or CCLs were revised as routine affair
- Institutional strengthening and training activities figured prominently in successful projects. Training activities were not limited to human resource development (as in IIRM under CAPP) but also focused on technical and engineering aspects of the projects, community-based systems survey and design, social facilitation, participatory appraisal and rapid appraisal techniques, and construction supervision and management. The good performance of consultants was also an important determinant of project success
- Cross-cutting themes common to all of the successful projects included issues of environmental protection and capacity building. The projects with successful wastewater components, in particular, had a strong positive environmental impact due to the reduction of untreated wastewater allowed to flow back into the ecosystem. The better water quality due to the treatment contributed to improvements in freshwater, coastal, and marine ecosystems. The more rational use of water resources in water supply components also had a positive effect on water aquifers and water tables in the project areas. This has been the principle motto behind all waste water projects under RUSDIP. Capacity-building initiatives, as noted above, also contributed to the success of projects.
- Other cross-cutting themes common to a number of projects included poverty reduction and support for gender/children issues. The improvements in facilities like in WSS and sanitation facilities in most cases were strongly pro-poor. Poor and disadvantaged persons in the project areas benefited both directly from improved health, thereby reducing medical expenses, as well as indirectly from increased availability of scarce medical services due to other nonpoor persons being healthier. Some of the most successful WSS projects were those that relieved women and children of the hardship of long-distance water collection—a task that they traditionally bear more than men. As a result of improved water supply, greater productivity and improved health were achieved, as more time was available for family care, education, and income-generating activities that

would have otherwise been used for water fetching. This impact was particularly evident in successful projects in RUSDIP under all 3 tranches.

N. Concluding Remarks

38 In conclusion, certain characteristics may be mentioned as common to all successful Water Supply/Wastewater Treatment Projects under RUSDIP. They are as below:

- Rapid urbanization created a strong demand for the output of water supply/wastewater treatment projects.
- There were positive impacts on intended beneficiaries, particularly women as they are the primary users of water which is needed for all household activities including cleaning utensils, washing clothes, cooking etc..
- There was an ability to learn from past lessons and incorporate the lessons in project design.
- Technical innovation and a positive impact on the environment occurred.
- Proper O&M helped ensure long-run sustainability.
- The projects typically (i) were run by financially self-sustaining water supply institutions, (ii) put in place WUCs, and (iii) adopted the “user pays” principle.
- A participatory approach contributed to success. Successful projects were typically formulated through extensive consultations with local government staff and the local community, including NGOs. Beneficiary participation resulted in a stronger sense of ownership and willingness to accept some O&M responsibility and to pay higher tariffs.
- Executing Agencies (EAs) were committed, highly involved in project implementation, supported by institutional strengthening and training activities, and provided with counterpart funds in a timely manner.
- Consultants and contractors performed well.
- Regular ADB review missions proactively helped to solve problems.

Appendix 1

Details of ACOs Mobilization Schedule

S. No.	Towns	Name	Date of mobilization	Experience of Social	No. of Trainings Attended
1	Alwar	Mrs. Kavita Bhatt	14.07.2010	08 Yrs.	CAPP Core Unit imparted training to ACOs before joining the project town and brief ACOs about project activities and CAPP activities. During the review meeting of ACOs CAPP Core unit imparted training and one training program organized on 25.11.2010 for all ACOs
2	Jaisalmer	Mrs. Seema Tanwar	29.07.2009	05 Yrs.	
3	Sikar	Mr. Govind Singh	17.11.2009	05 Yrs.	
4	Sawai Madhopur	Mr. Devendra Singh	01.12.2009	12 Yrs.	
5	Bharatpur	Mr. Bhupendra Kaushik	11.01.2010	05 Yrs.	
6	Bundi	Mr. Chiranji Lal Chandel	11.01.2010	08 Yrs.

Appendix 3

List of Revised SRPs Due to change in Scope of Work/ Additional Work in Tranche 1 & Tranche 2.

S. No.	Subproject Name	Description	Remarks
1	Alwar Waste Water (RUSDIP/TR-01/ALW/WW/03)	Supply, laying, joining, testing and commissioning of various trunk and lateral sewers connecting to out fall, road restoration along with all necessary manholes and other appurtenances etc. at Alwar town.	Will be merged with previously approved SRP of Alwar Waste Water
2	Alwar Bridge (RUSDIP/TR-02/ALW/BR-01)	Construction of ROB at LC No. 113 SPL/E Daruheda to Gangapur City (SH-25) in Alwar.	Separate SRP will be prepared, Scope yet not finalization
3	Jaisalmer Waste Water (RUSDIP/TR-01/JSL/WW/02)	Supply, laying, jointing, testing and commissioning of main sewer, various intercepting sewers, collecting lateral sewers in Gandhi Colony, Indira Colony, RP Colony, part of Gafur Bhatta and GAD Colony etc., road restoration along with all necessary manholes and other appurtenances etc. Construction, supply, erection, testing and commissioning and five year Operation & Maintenance of sewage pumping stations in Gandhi Colony including all civil, electrical, mechanical, pumping & other allied works at Jaisalmer Town.	Will be merged with previously approved SRP of Jaisalmer Waste Water
4	Bharatpur Water Supply (RUSDIP/TR-02/BPR/WS/05)	Additional water supply works including pumping machinery, DI rising Main, uPVC distribution pipe line and construction of 5nos. OHSR in Bharatpur Town.	Will be merged with previously approved SRP of Bharatpur Water Supply
5	Baran Bridge (RUSDIP/ TR-02/ BRN/BR/03)	Construction of 2 lane ROB at at level crossing no. 38 on SH-1 (Baran Jhalawar) at Baran	Separate SRP prepared and submitted
6	Chittorgarh Bridge (RUSDIP/TR-02/CHT/BR/02)	Construction of 2 lane ROB at at level crossing no. 88 B (Kumbha Nagar level crossing) on NH-76 & 79 at Chittorgarh	Separate SRP prepared and submitted
7	Sikar Solid Waste (RUSDIP/TR-02/SKR/SW/01)	Development of sanitary landfill Site in Sikar	Separate SRP prepared and submitted

S. No.	Subproject Name	Description	Remarks
8	Sikar Streets (RUSDIP/TR-03/SKR/ST/01)	Widening & strengthening of existing roads at Sikar town.	Separate SRP prepared and submitted
9	Karauli Bridge (RUSDIP/TR-02/KRL/BR/01)	Construction of high level bridge in Karauli	Separate SRP will be prepared, Scope yet not finalization
10	Rajsamand (RUSDIP/ TR-02/ RSM/WS/04)	Additional water supply works including replacement of the AC pipeline by DI pipe line laid from Dhayla to Rajsamand with Raw water reservoir. Pump house for providing water supply to town Rajsamand.	Will be merged with previously approved SRP of Rajsamand Water Supply but additional scope is not yet finalized
11	Bundi Streets (RUSDIP/TR-03/BND/ST/01)	Widening of existing road from Khoja gate to bypass link road. Widening of existing road from petrol pump triangle bypass to Rotary Club triangle via Rani ji ki Bawari and interlocking footpath.	Separate SRP prepared and submitted

Revised SRPs Due to change in Alignment – 3 SRPs

S. No.	Subproject Name	Description	Remarks
12.	Alwar Water Supply (RUSDIP/TR-01/ALW/WS-02)	Providing, laying, jointing, testing & commissioning of water pipe line for the strengthening of distribution system and replacement of leaking pipelines and rising main pipelines; construction and commissioning of elevated service reservoirs.	Previously approved SRP revised due to change in Alignment and submitted
13.	Alwar Bridge (RUSDIP/TR-01/ALW/BR/01)	Construction of approaches & viaduct spans of ROB at Itarana Level Crossing No 117 in Alwar.	Previously approved SRP revised due to change in Alignment and submitted
14.	Nagaur Waste Water (RUSDIP/TR-02/NGR/WW/01)	Design, construction, supply, erection, testing, commissioning and five years Operation & Maintenance of 8 MLD sewage treatment plant near Balwa road and sewage pumping/ lifting station including all civil, electrical, mechanical, pumping and other allied	Previously approved SRP will be revised due to change in Alignment and reduction of APs.

Status of SRPs/CCL Approval
